A Project Guide To Volcanoes (Earth Science Projects For Kids) (Earth Science Projects For Kids (Library))

Synopsis

Mysterious and powerful, volcanoes remind us that nature is in charge. We watch in awe as they erupt with fiery rivers of lava or with explosions that bury whole towns in ash. Volcanoes literally turn the earth inside out, bringing hot molten rock from deep inside the earth to the surface. Learn more about the spectacular geology behind volcanoes with twelve fun science projects you can do yourself. You'll think like a volcanologist as you build a model volcano that really erupts, re-create the formation of Hawaii, and make your own power station using the heat that powers volcanic eruptions. Get up close and personal with the destructive forces of the earth!

Book Information

Series: Earth Science Projects for Kids (Library)

Library Binding: 48 pages

Publisher: Mitchell Lane Publishers; 1 edition (October 27, 2010)

Language: English

ISBN-10: 1584158689

ISBN-13: 978-1584158684

Product Dimensions: 6.6 x 0.4 x 9.3 inches

Shipping Weight: 10.4 ounces

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #1,087,484 in Books (See Top 100 in Books) #124 in Books > Children's Books > Education & Reference > Science Studies > Nature > Earthquakes & Volcanoes #586 in Books > Children's Books > Science, Nature & How It Works > Experiments & Projects

Grade Level: 3 - 6

Customer Reviews

Claire O Neal has written over a dozen books for Mitchell Lane Publishers, including A Project Guide to Rocks and Minerals and A Project Guide to Earthquakes for this series, and Projects in Genetics and Exploring Earth's Biomes in the series Life Science Projects for Kids. She holds degrees in English and biology from Indiana University, and a Ph.D. in chemistry from the University of Washington. She lived in the shadow of Mt. Rainier for five years. Now she makes her home in Delaware, where it is tectonically boring, with her geologist husband and two young sons.

You will love how this book describes each of 6 types of volcanoes, then offers creative projects to

bring each type to life for your kids. Very memorable projects, very interesting, and very do-able as group projects in class _or_ family projects in homeschool.Excellent resource.
