First, this is a great way to get a lot of tabletop game figures for not a whole lot of money. I assume that's why most people buy this (it was for me). If that's all you're interested, this is a 5-star product. You can't beat the price per character (unless you color print on cardstock and spent hours with a pair of scissors cutting them all out). As for the reviewer who said this does not work with 5e: these *do* work with D&D 5e. The names may not be the same but there are a lot of resources for finding pre-generated NPC stats if you need them; I bought these to find characters that work with the LMoP starter adventure and it is very easy to find Lord Albrek, some Redbrands, a bunch of cultists, townsfolk, etc. As to the product itself: viewing the product on its own merits (and not just as one of the cheapest ways to get a ton of characters), there is some room for improvement. While most of

the art fits on the tokens, some are not centered or scaled (one archer's bow is completely off the perforated card, there are some clipped feet and hands). Some of the artwork is a little dark, like the colors don't pop. I can't tell if that's intentional or not - but it makes the figures less appealing from across the table in anything but full daylight. That being said, lots of the characters "match" so you can have a good theme or color palette running for a particular group or organization. The standard cutpurses and pickpockets make for good background characters. There are enough bases for most encounters, but the inclusion of some "small" bases for the small-sized creature would be nice (they have to share the medium bases). It would also be nice to have a couple copies of some sort of lifted or raised base for the handful of villains that can obviously fly. Lastly, there is a LOT of cardboard left over after you remove the tokens. I'm sure they've done the waste/quality analysis, but especially in a product with these kinds of margins it is sad to throw away like 1/3 the weight of the original product. That's expensive cardboard.

A good amount of well designed and beautifully drawn villain pawns.

My only problem is that I bought it thinking it would work with D&D, but the monsters are not the same, however I make it work so I still think it gets four stars! It could use some more bases though.
