United Kingdom (National Geographic Adventure Map)

Synopsis

Waterproof Tear-Resistant Travel MapNational Geographic's United Kingdom Adventure Map is designed to meet the needs of adventure travelers with its detailed, accurate information and user-friendly design. Cities and towns are easy to find with the map's helpful index. Motorways, highways, and other roads are clearly designated and include distance in kilometers so travelers can easily plan their best route. With specialty content to include hundreds of diverse and unique recreational, ecological, cultural, and historical destinations, this map is a perfect companion to a guidebook. The south side of this map covers the southern portion of the UK, from the tip of France and across the Isle of Man to Northern Ireland. The north side shows Belfast, and across the Channel to Edinburgh, the Outer Hebrides, the Orkney Islands, and the Shetland Islands. The United Kingdom is comprised of the island of Great Britain which includes England, Wales, and Scotland; surrounding islands including the Outer Hebrides, Orkney Islands, and Shetland Islands; and Northern Ireland. No part of the UK is more than 75 miles from the sea, but the geography is diverse. England consists of mostly lowland terrain with mountainous regions found in the north and in Wales. Scotland is divided into two distinct regions by the Highland Boundary Fault which separates the Highlands to the north and west and the lowlands in the south and east. The largest body of water in the UK is Northern Ireland's Lough Neagh. Though it is the largest body of water by surface area, Scotland's Loch Ness is larger by volume due to its great depth. Every Adventure Map is printed on durable synthetic paper, making them waterproof, tear-resistant and tough • capable of withstanding the rigors of international travel. Map Scale = 1:825,000 Sheet Size = 37.75" x 25.5" Folded Size = 4.25" x 9.25"

Book Information

Series: National Geographic Adventure Map (Book 3325)

Map: 2 pages

Publisher: National Geographic Maps; 2013 edition (June 15, 2013)

Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

We used the map on a recent 12 day trip to the UK. It does include many interesting tourist attractions, and is easy to use. On the downside, many stretches of road are not labeled, leaving us to guess whether we were on A65 or A65, etc. It is not always detailed enough to get you from point A to point B, even if A and B are reasonably large towns. We did have to get a detailed map of the UK in order to confidently find our way around.

Seems like a great map. Like the fact that they mark castles and other historical sites. Will find out in Oct. when I travel to UK.

Good Map but it has a Major Flaw!!! The major flaw is there are no road numbers except for major A Roads. This is not a problem if you stay on major Motorways but major problem if you are exploring as the name of the map implies. "Adventure Travel Map".

Good for general guidance, but not very effective as a map for driving; shows only major roadways.

We are planning a trip to England in 2017 and needed to know where we might go. This is a beautiful, large, heavy paper, map with easily readable and understandable graphics and information. It has made our planning so much easier! It's been exactly what we wanted. It came promptly and was exactly as promised. We are quite pleased!

This map was very helpful on our tour of the UK. It showed many interesting attractions with simple pictures and many weren't the usual tourist destinations, though those were included. I would recommend it. We also rented a car in Scotland and were given a good map by the rental company.

Actually I never actually used the map while there while there in Great Britain. I was on a bus and too busy watching/viewing to look at the map.. Map looked like it was just fine tho.Brian

Good map with great feel. What I mean by that is that it is laminated, but not inflexible.
