Color Atlas And Instruction Manual Of Peripheral Blood Cell Morphology

Synopsis

This essential guide can help readers identify blood type cells, which are difficult to categorize, and explains the morphologic characteristics of peripheral blood cells in detail. Some of the book's features include: color photographs that depict each stage of cell maturation in the exact sequence of development; comparative photographs of difficult-to-identify cells from different cell lines with adjacent diagrams and instructions in chart form; and an explanation of the entire differential procedure, with mathematical guidelines.

Book Information

Plastic Comb: 316 pages

Publisher: LWW; 1 edition (January 1, 1984)

Language: English

ISBN-10: 0683066242

ISBN-13: 978-0683066241

Product Dimensions: 10 x 7.2 x 0.8 inches

Shipping Weight: 1.5 pounds

Average Customer Review: 4.2 out of 5 stars 17 customer reviews

Best Sellers Rank: #313,999 in Books (See Top 100 in Books) #31 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Hematology](#) #46 in [Books > Medical Books > Medicine > Internal Medicine > Hematology](#) #70 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Diagnostics & Labs > Laboratory Medicine](#)

Customer Reviews

Not as good a quality as expected the binding was broken and stops the pages from being turned.

It is as it was described. The deliver was faster than expected which was surprising. This is a 10 star for me.

I bought this after being out of the field for 15+ years as a refresher. It was exactly what I was looking for. I would recommend this book as a reference book for the new graduate.

good lab book

Needed this book for school. Good pictures and was useful. A little too expensive, like all books for

school. A necessity.

Excellent book

great book

Great drawing detail
