I bought these for my son as we will take the MCAT next August. He tells me these are the best study guides available. Anyway they are very thorough and comprehensive. He can use these flashcards whenever he has free time to study

Very helpful in preparation for the MCAT. Great for refreshing terms or adding more terms to your vocabulary before test day.

They have a little of everything

These were a big disappointment. They are super tiny very thin paper not heavy card stock or anything like a real flash card doubt they would get much use before they were ruined....Returning them

The code for the app didn't work. This was the main reason I bought it. Haven't used it nearly as much as I would if I could just pick up my phone/tablet and look at it. In 2016, mobile capability is a must.

Amazing way to test your science knowledge and review for the mcat. I would have paid double this for how amazing this product is.

I used the app more than the actual cards. The cards are pretty flimsy, but have a nice design. Not the best study tool in the world, but it is nice to get a broad review of concepts. It can also help show you areas you need to focus on.

thank you!
