# The Three R's: Reuse, Reduce, Recycle (What Do You Know About? Books)

## **Synopsis**

Attractive color illustrations and easy-to-follow text combine to present factual information that younger boys and girls will readily absorb and understand. The Three R's: Reuse, Reduce, Recycle is one in a series of four entertaining What Do You Know About? books, for very young children. It describes the ways in which kids and their families can avoid waste and be environmentally conscious. Four pages presenting activities for children appear at the back of the book, followed by a two-page section for parents, with tips on explaining the subject in more detail.

## **Book Information**

Age Range: 4 - 8 years

Lexile Measure: AD1030L (What's this?)

Series: What Do You Know About? Books

Paperback: 36 pages

Publisher: Barron's Educational Series (February 1, 2007)

Language: English

Product Dimensions: 0.5 x 9.5 x 9.5 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 19 customer reviews

Best Sellers Rank: #159,922 in Books (See Top 100 in Books) #127 in Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology #219 in Books > Children's Books > Education & Reference > Science Studies > Nature > Environment #236 in Books > Children's Books > Growing Up & Facts of Life > Health > Diseases

## **Customer Reviews**

Rosa Maria Curto is the illustrator of more than 40 children's Spanish books.

Good book for introducing the concept of reuse, reduce, and recycle. I appreciated how the book avoided questionable science n technology and just focused on everyday lifestyle perspectives. The book does a good job of normalizing the sharing of second hand clothing and hand me downs objects and that doing so is responsible. Overall this book gives an interactive starting place or springboard into further ecological curriculum. Side note: I want to make it clear that i am not a green radical and i do not own a solar panel or windturbine.... I am a homemaker and scientist who just

happens to know the real facts. The flat out truth is our society is so caught up in materialism and convenience that we are harming the earth at an unprecedented rate. Think of how many cities put all their trash on barges and dump it into the sea... Burry it in the ground.... Or burn it releasing the chemicals into the air. Think of how many chemicals go into making these items that are thrown away... Do we really want to eat those chemicals in our seafood, drink them in our water, or breathe them in? Green energies are not the solution to our problem. What we need is drastic societal changes to reduce, reuse, and recycle.

I'm a Daisy Scout leader and after we toured the county recycling center, we read this book and did a fun craft with plastic garbage bags (made "Plarn" bracelets). The girls were attentive and liked the story and imagery. They earned their 'Use Resources Wisely" petal from this and I might read it with my kids on Earth Day, too!

this is a cute book. no underlying political statements. gives a lot of information. illustrations are engaging.

This book was an excellent resource to keep my classroom engaged while learning about Earth Day. I teach primary SE, and this book was easy enough to be used as a read aloud. The illustrations also allowed those not yet able to access print, to do a picture walk and stay on topic. I'll keep this one.

Gave these to Great grandson, great granddaughter and great grand nephew!

Grandson loves it - entertaining with an important lesson.

Great resource for the classroom.

I knew it will be useful for my 4 years old class.
