Customer Reviews

I bought this book for my 13 year old home schooled daughter. I love the ease of use and the layout of each math problem. The range from easy problems to hard problems listed on each page makes it challenging but not overwhelming for my daughter. I also like the sample solution of one problem at the top of each page. This sample solution refreshes my memory of how I did the math problems when I was her age; thus enabling me to teach her with the correct method.

Whether you are a home schooler or just getting the most from your student this math workbook will

do the trick. My wife and I have trusted Spectrum workbooks for years, this book also does keep advancing the students skills and abilities. Need one, buy one. Enjoy.

Great refresher course for adults who haven't done math in years. I'm going back to school and hoping to be placed in a better math class so this has been helpful.

I've been looking for math educational material for my son's grade level now that we are home schooling and this is just what I was looking for.

good preparation book

great product for my daughter to help my grandson improve his skills in math and this particular product has a great package for student and teacher

this book kept my child ahead of the game and ready for the new year in math.

No answer key!?
