Average Customer Review: 4.7 out of 5 stars 53 customer reviews

Best Sellers Rank: #8,829 in Books (See Top 100 in Books) #7 in [Books > Education & Teaching > Schools & Teaching > Common Core](#) #29 in [Books > Education & Teaching > Schools & Teaching > Curriculum & Lesson Plans](#) #43 in [Books > Children's Books > Education & Reference > Math](#)

Age Range: 6 and up

Grade Level: 2 and up

Customer Reviews

Book by HOUGHTON MIFFLIN HARCOURT

My son had just switched schools and was behind his class in math we got this book based on his teachers recommendation and he has already caught up he loves it.

This is a great practice book. First of all, all the pages are tearable where kids can work on it one page at a time. Each page has 4-5 questions. Fonts are big and clear. Questions are easy for my second grader to figure out without any help from me. The only thing I don't like is that there are no answers at the end of the book.

I like the Go Math series. My older one, who is now in high school used the same series, and now it's his little brother's turn. This is just a practice book; the kids cut them up and bring them home for weekly homework. I got the practice book for 1st graders last year, and it was a big help. There are

no lessons here, only activities kids can do. So if you are unfamiliar with models and different methods of calculation, youtube will be your bestfriend.

This is the curriculum my daughter's school uses. I bought this to keep up her math skills during the summer. She loves math and this really helped her!

Solid math activity book. I used a similar book before for my 1st grader and it help her tremendously. This one is about the same with 2nd grade math

Thank you for helping us to me be able to over view your curriculum.

Exercises good enough for the 2nd graders, but I don't know where it stands if compared w/ other books (country or world wide).

Have been using with the grandkids as extra help this year. Excellent tool.
