The French Canadians Of Michigan: Their Contribution To The Development Of The Saginaw Valley And The Keweenaw Peninsula, 1840-1914 (Great Lakes Books Series)

Synopsis

Most information regarding the French Canadians in Michigan concerns those who settled during the French period. However, another significant migration occurred during the industrial period of the nineteenth century, when many French Canadians settled in the Saginaw Valley and on the Keweenaw Peninsula-two regions characteristic of Michigan's economic development in the nineteenth century. The lumber industry of the Saginaw Valley and the copper mines of the Keweenaw Peninsula provided very different challenges to French Canadian settlers as they tried to find ways to adapt to changing environments and industrial realities. The French Canadians of Michigan looks at the factors behind the French Canadian immigration by providing a statistical profile of the migratory movement as well as analysis of the strategies used by French Canadians to cope with and adapt to new environments. Using federal manuscript censuses, parochial archives, and government reports, Jean Lamarre closely examines who the immigrants were, the causes of their migration, their social and geographical itinerary, and the reasons they chose Michigan as their destination. Besides comparing the different settlements in the Saginaw Valley and the Keweenaw Peninsula, Lamarre also compares the Michigan French Canadians to the French Canadians who settled in New England during the same period. This book is a major contribution to the study of the French Canadian migration to the Midwest and will be valuable to researchers of both Michigan and French Canadian history.

Customer Reviews

The first major study of the migration of French Canadians to Michigan during the nineteenth century and their substantial impact on the state's development.

Most information regarding the French Canadians in Michigan concerns those who settled during the French period. However, another significant migration occurred during the industrial period of the 19th century. The lumber industry of the Saginaw Valley and the copper mines of the Keweenaw Peninsula provided very different challenges to French Canadian settlers as they tried to find ways to adapt to changing environments and industrial realities. "The French Canadians of Michigan" looks at the factors behind the French Canadian immigration by providing a statistical profile of the migratory movement as well as analysis of the strategies used by French Canadians to cope with and adapt to new environments. Using federal manuscript censuses, parochial archives, and government reports, Jean Lamarre closely examines who the immigrants were, the causes of their migration, their social and geographical itinerary, and the reasons they chose Michigan as their destination.

Wonderful detail of the 1890-1920s and all the Canadians who left after their harvests and moved from one part of Michigan to another, cutting the tree line more North each year to satisfy the unsatiable appetite for lumber in the US. Many Canadians eventually made a permanent move as they found year-round employment and a more stable income. Great book for history lovers.

Glad to find French Canadian history book written in English. My fault that my French language capabilities are so poor.

An OK book

Great reading very informative
