Frame Design For Boat Tops: The How And Why For Optimal Design And Construction

Synopsis

Frame Design for Boat Tops gives you the how and why for optimal design and construction. This book was written by Tom Hunter, certified Master Fabric Craftsman, long time Marine Fabricators Association (MFA) board member and frequent speaker at MFA national and regional conferences. He uses his extensive background in engineering, boating, and boat top fabrication to help marine fabricators understand the principles behind making the strongest and most functional boat top frames.

Book Information

Paperback: 88 pages

Publisher: CreateSpace Independent Publishing Platform; 4 edition (October 24, 2014)

Language: English

ISBN-10: 1502535564

ISBN-13: 978-1502535566

Product Dimensions: 5.5 x 0.2 x 8.5 inches

Shipping Weight: 5.9 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 4 customer reviews

Best Sellers Rank: #875,496 in Books (See Top 100 in Books) #149 in Books > Engineering & Transportation > Engineering > Marine Engineering

Customer Reviews

Tom Hunter opened his marine canvas business in 1987. He is a certified as a Master Fabric Craftsman by the Industrial Fabric Association International. He has served on the board of the Marine Fabricators Association over 15 years, including as Chairman. He has owned a boat since the age of 11 and still owns a boat today. He has multiple engineering degrees from Northeastern University in Boston. All of this combines to give Tom a unique perspective on boat top frame design.

Just getting into marine canvas. Great book. Thanks to the author for putting out the info.

All the information you need to know....great reference tool!

This really is an essential book for those who need to design boat frames. It has the how and why of all basic boat frames written from an engineer's point of view. I will now be able to design a stronger

frame than what my eye was telling me before, and have the know how to back up my esthetics with structural design and strength.

This is a great reference book for building stainless and aluminum frames. The diagrams have been extremely helpful in our shop when someone has a question or is trying to figure out what will work well. Great book to have in the shop for any frame builder!
