I recently discovered the 'Nat Geo Kids First Book of ..' series and got them for my nephews! These are an instant hit, not just with them but with also their parents! I am myself enthralled with the quality of the book and the simple language and vivid images that jump out of the book! My 6 and 4 year old nephews love reading them out loud. There are very few immensely satisfying feelings in the world and listening to a kid read out of a book he loves is definitely one of the top 10! :) I pre-ordered this from Amazon and their price guarantee is unparalleled! A Day after the book released, it was in the hands of the tiny tots! (LOVE Amazon Prime!) The entire set of books make a very very treasured gift set. You can't go wrong with Nat Geo! These will keep you coming back and reading them over and over again! :)

This book is WONDERFUL. My 2 year old daughter never tires of reading it & looking at the beautiful pictures. She has learned the names of so many species & the other day, we were watching Finding Nemo & she got excited when she could identify the Anglerfish! This was a great buy & I have even learned some interesting facts, too. Looking forward to purchasing more in this series.

These National Geographic books are the best for little kids. I've been collecting them slowly and my 3 year old loves them! They do a nice job highlighting common and uncommon animals in each category. Plus the pictures are bright and colorful and I love the extra durability of the hardcover. Would definitely recommend these to parents of young kids and we will continue to collect the others in the series.

I co-own a daycare facility with children 6 weeks to 12 years of age. The kids love this book, I have read it dozens of times already and learned a few things along the way. I am a National Geographic geek from way back but had to censor my Nat Geo books and magazines to show 2-12 year olds so these allow me to share the pics without the more adult content. Great pics, easy to explain to younger kids, we have even used it for our toddler class (under 2). The kids at work actually asked

me to get the rest of the series and we take them out every morning to start the day.

This book was probably my favorite purchase this past Christmas season. My daughter is 3 and a half, and wants to read about different animals every night. The pages are filled with pictures, and the writing makes it so easy for little minds to understand. She now walks around telling people about anemones and all of the different types of starfish she knows about. We plan on purchasing other National Geographic kids books, as our daughter's "sponge" of a brain is taking in so much animal knowledge from them!

My grandson absolutely loves this book. The pictures are wonderful, and the wording is such that he has great comprehension of what he's read.

First of all the book is wonderful. THE BINDING IS TERRIBLE! The book is seriously in separate pages throughout my classroom. I am a teacher but I have a very small class (under 10 students) and that the book would seriously fall apart in my hands after 2 months is ridiculous! The kids love the book but over half of the book is taped together. When a teacher spends her own money on things for the classroom this is not the quality we expect.

Beautiful book in the series - never disappoints! Great gift to accompany her new aquatic animal sets!! Thank you!
