Book by Moynihan, Elizabeth B.

This book was recommended by Emma Clark in her book [The Art of the Islamic Garden](#). This book sets out to give the reader a brief walk through Persian / Mughal history; with a focus on their gardens. The details on the gardens, from a historical perspective, are light...but that worked in favor of the book as a high level historical review of the gardens. The layout was excellent, as the author moves across Asia, 1 generation at a time. So in all, the reader is left with a deep impression of the cultural changes in gardening, and garden design over the past 100 years, in South Asia. It's a fantastic walk through history. It was refreshing ,and the 70's writing style made it an easy read. I enjoyed this book immensely.Negative: I found the black and white gardening photos particularly bad. A reprint with color photo's would help.

This used book and lacked the graphics and illustrations I expected. It would be worth about an eighth of what I paid for it. It was not value for money. We should all take care before spending such a large amount of money on a title and description that promises so much, but delivers so little. There are much better books on this subject available.
