Connie M. Han, RVT, Veterinary Teaching Hospital, Purdue University, West Lafayette, IN; and Cheryl D. Hurd, RVT, Veterinary Teaching Hospital, Purdue University, West Lafayette, IN --This text refers to an alternate Paperback edition.

As a vet student looking for more information to benefit my studies, this book was a good deal. Covers a lot of small animal, but is lacking in large animal.

Useful as a reference for Licensed technicians safely taking and positioning radiographs of veterinary patients.

The book I got was a print-on-demand book, and the quality of the images was sub-par. This

textbook is supposed to demonstrate ideal radiographs and technique, but the reprinted pages and images were so poor that all of the rads looked over/under-exposed. For example, the illustration of the ideal abdominal film is a black box with only a spine showing. There are many books that print-on-demand works great for, but it doesn't work great for ones where the quality of the illustrations is so important. The actual text was suitable and instructional. I wish I bought a used first edition instead of a new one.
