# Nurse To Nurse Dementia Care

## Synopsis

Learn dementia care from an experienced colleague! From a senior faculty member of the Copper Ridge Institute comes peer-to-peer guidance on how you can give the best possible care to dementia patients and their families. Part of McGraw-Hill's Nurse to Nurse series, this title includes PDA download of the entire text, vignettes, nursing alerts that feature just-in-time information on complex or particularly important aspects of patient care, and Therapeutic Dialogue Boxes that provide nurses with specific communication solutions for both patients and their families. Coated flex-binding repels stains. Features: Dementia basics Common complications of dementia Assessment of dementia Caregiving basics Common problems in daily care Managing behavioral problems Designing activities Helping families The new Nurse to Nurse series is specifically designed to simulate the teaching experience from which nurses learn best: trusted mentors carefully explaining what they must do in specific clinical situations. Written in a consistent, single-author voice, each book in the series brings the wisdom and experience of some of the foremost experts to non-specialist nurses in clinical care.

Copper Ridge, located in Sykesville, is an extension of the JHU School of Medicine that focuses entirely on Alzheimer's.

If you've never work with dementia then it has great info for you. If you have some experience with dementia patients its has some useful info. Like, oh, I forgot that or, I've tried everything else maybe that will work. If you are very experienced with dementia patient it will be either, I already know that or just a helpful reminder. I myself have some experience so it gave me new avenues to try. Worth the read.

This book is perfect for any nurse new to Dementia care. I wish I had had it when I started on my Dementia unit a year ago! It clearly explains the different forms of dementia, and gives an accurate view of the needs of this patient population. this book has definitely improved the quality of care I am able to provide, and has enabled me to give proper explanations of the illness to family members.

Just what I expected.

OK. the old one has been broke in my family , This is my first review ever. This product is so sharp it is scary! Best investment ever at a great price! great and good experience. arrive on time.
