Customer Reviews

Great continuation I am so enjoying this series I feel enveloped and guilty I'll never achieve self sufficiency sitting on my arse enjoying these books!!

I really like all of his books. I think that young readers would find them very entertaining for they're shirt read and hold your interest.

Keep em coming! Great series of books. Cant wait to read the next one!

great

Great read

The first book kept me interested. This one bored me. There was no frame of reference, no way of understanding what is happening. The main character is little more than a passenger throughout. Even the danger isn't precisely targeted; there is no specific peril for the principle characters. Weapons are named and used without any real understanding for physics, or even defined 'new' physics in this universe. More science fantasy than science fiction.

Another staying up late thrilling adventure reading fun. I couldn't stop turning pages for the next action scenes. A fan.

I was expecting more. This was kind of a repeat of book 1. Difference being instead of a desert world running through tunnels, it's an ice world running through tunnels. Now they're on a jungle world in book 3. Please no more tunnels or I may not make it to book 4.
