Customer Reviews

Joe Snedeker, Med, is a meteorologist for WNEP-TV in the Scranton-Pocono Region of Pennsylvania. He has a BS in earth and space science/meteorology from the Millersville University of Pennsylvania and an MEd in biology/environmental science from East Stroudsburg University of Pennsylvania. Joe was a public high school science teacher for more than ten years and currently teaches science and meteorology at Marywood University when he is not totally immersed in his family: his wife, Dawn, and his three children, Joey, Lucas, and Aleah. He lives in Jermyn, PA.

Very neat challenges/puzzlers that my daughter really likes solving. Great info., in such a fun way! I'm guessing best for 6-10 yr. old range.

Bought this book for our weather week unit for our homeschooling Montessori Classroom. It was a great book to utilize during that week for weather week. And I will be able to use it over and over throughout the year as well. It was a fun book to add to our personal homeschooling library at home.

I bought this book for my 6 year old grandson because he has a high interest in Tornadoes. So I figured he needed to know about other weather patterns besides tornadoes. He loved this book.

The book was delivered in good shape, when I open the pages I was very disappointed. All of the wording is printed in a very faint black, or a gray making it difficult to read. That's when I stopped and wrote this review. I didn't get to evaluate the context on the subject.

nice

Reading to my grandsons

Purchased for my grandson who is currently into "weather". He seemed to enjoy it. Easy for him to read (8 years old)

I bought this for my son's friend who was turning 7. According to his mom he LOVED it! She said he was very excited to do the different experiments!
