Veneer Visions / Vistas De Carillas

Synopsis

Dental esthetics is about much more than simply optimizing the dentition. The state-of-the art veneer procedures described in this atlas require neither reduction of tooth structure nor administration of anesthetic; the perfect smile can be delivered to patients in one painless appointment. This innovative technique of veneer fabrication challenges conventional methods of restoration and is tailored to meet the demands of cosmetic dentistry patients. Moreover, use of a wax-up/mock-up allows patients to experience the dramatic transformation for themselves by wearing the proposed smile makeover before committing to treatment. Abundant full-color before-and-after cases demonstrate the use of no-prep veneers alone and in combination with other fixed prostheses and present the esthetic possibilities of this revolutionary method. A dual English/Spanish language book.
