## Customer Reviews

I purchased these to give to the youngest guests at a large birthday dinner for a relative. The small size was perfect for them to use at the dining table, and the large graphics were fun and easy even for the two-year-old. The books and a small box of crayons made an inexpensive, easy party favor that kept the children busy until dinner was served. Everyone praised the little ones artistic skills and the children were happy and eager to share their work with the birthday honoree. It was a nice way to keep the children busy without excluding them.

Adorable and she loves grabbing it every morning to do some coloring or pointing out the animals to me. It definitely helped her learn some new animals you rarely read about in other kids coloring books, these are not basic animals. Therefore I believe it really curves her mind and gets her brain

working harder for a small price.

My 2.5 year old son LOVES this book to look at and say the letters, however, the copy i received has a huge misprint... next to the "T" is a picture of the Lazy Lion... then it goes on to show M through S again. If T thru Z were printed correctly i would have given a 5. and it is much smaller than i expected... but still cute.

I like that it's small enough to carry in my purse, in the ready to be pulled out and given to my 20-month old while we're waiting for our food at a restaurant. At first I thought, "A very small coloring book for a very small boy. Perfect!" But then, it is just a bit too small. We usually need to hold down the pages for him so that it doesn't move while he's scrawling on it.

I was looking for coloring books to have in my purse for when I'm out with my kids. Keeps them entertained at restaurants and while shopping. This was the perfect size! A lot more pages than I was expecting as well, just over 62 pages to color.

This book is really hard to color in because it's so small and the pages don't lay flat. It's more like a picture book than a coloring book because of that. I do like this one better than the dinosaur one because the pictures are more interesting.

On each left-hand page, we see a capital letter and an alliteration consisting of an adjective and an animal name.(H, hungry hippo).On each right-hand page, we see an appropriate illustration.The book is small, but the illustrations are large. The book might be large enough to show to a group of children.

This is very small as others said but what's the big problem. I think its a great little coloring book for the price. Has A-Z animals and letters to color, in order. Bought this for my 18 month old and he likes it. (Couple wiered animals listed rather than basic animals, but no big deal...can always use as a chance to learn more.)
