I did a survey before about mind control and most says that it is not true. I did more research about it and I saw this book, it got my interest so much. This is different on what I am looking but this is so interesting topic. This book explained to me if mind control is really possible. The book discussed the early government brainwashing. I learned the similarities between old and new governments. I saw the real mind control of the 20th and 21st century. This is such a great book and the information is amazing.

My opinion is this presentation is a dual synopsis of "The Franklin Coverup" and "France formation of America". Because I read both books, I did not glean any new info.

Interesting read packed with a lot of information in such a short book. I definitely recommend to anyone interested in learning more about the topic.

Not a bad book if your interested in this sort of thing buy it

Still reading and will save for future reference. Scares the Hell out of me.
