Lubarsky, M.D. is a professor and chairman in the Department of Anesthesia at the University of Miami School of Medicine in Miami, Florida. Dr. Sudharma Ranasinghe is Associate Professor of Clinical Anesthesiology and Assistant Director of Obstetric Anesthesia at the University of Miami/Jackson Memorial Hospital in Miami, Florida.

Used this for Boards and loved it!

Have come across multiple technical errors while reading this book. Finally put the book down while reading this, regarding positioning on page 83.Q: "With supine positioning, what is the ideal placement of the arms?"..... A: "The goal is to avoid stretching the brachial plexus. The arms should be abducted less than 90 degrees, and pronated with palms down....."Anyone with more than a week of anesthesia training can point out the fundamental flaw here. Wish this book would cite it's reference for each question. Very disappointed.

for myself, Very well. fast shipping. tell a lot of the product . I'm very pleased with this product. It was affordable, and it cuts great. I was replacing an extremely dull chef's product that I couldn't seem to get sharp. This product has been a welcome change.

I am a CRNA of 22 years. I received this book as a gift in February 2006 from a graduating student who I often precepted. I was initially excited upon receiving this book as there are few books written specifically for nurse anesthetists. Upon completion of going through this book, I feel this book was very poorly written, edited, and organized. It was brief in areas that I believe are important...and lengthy in non-essential aspects of anesthesia. It felt like a hastily put-together book. I found multiple errors that were confirmed by my other existing anesthesia texts. Avoid purchasing this book. Someone, someday will make a good nurse anesthesia review book.
