NUTR (with NUTR Online, 1 Term (6 Months) Printed Access Card) (New, Engaging Titles From 4LTR Press)

Synopsis

Learn Nutrition YOUR way with NUTR! NUTR's easy-reference, paperback textbook presents course content through visually-engaging chapters as well as Chapter Review Cards that consolidate the best review material into a ready-made study tool. With the textbook or on its own, NUTR Online allows easy exploration of NUTR2 anywhere, anytime - including on your device! Collect your notes and create StudyBits from interactive content as you go to remember what's important. Then, either use preset study resources, or personalize the product through easy-to-use tags and filters to prioritize your study time. Make and review flashcards, review related content, and track your progress with Concept Tracker, all in one place and at an affordable price!

Get Ahead with McGuire/Beerman's NUTR [View larger](#) [View larger](#) [View larger](#) Anytime, Anywhere with 4LTR Press Online! NUTR Online allows easy exploration of NUTR anywhere, anytime - including on your device! Collect your notes and create StudyBits from interactive content as you go to remember what's important. Then, either use preset study resources, or personalize the product through easy-to-use tags and filters to prioritize your study time. Make and review flashcards, review related content, connect with classmates and track your progress with Concept Tracker. Add in access to assignments and documents from your instructor, and you have

everything you need in one place and always accessible! **Shorter Chapters** Shorter chapters in a design that's easy to reference presents Nutrition content in a more convenient and accessible style, complete with visuals to help you better recall the content. **Tear-Out Review Cards** Tear-Out Review Cards at the back of the textbook provide a portable study tool containing all of the pertinent information for class and test preparation. **Figures and Visuals Help Deepen Your Understanding** Chapter figures and visuals help deepen and facilitate your understanding of each chapter's key concepts. New Chapter Review cards provide summaries and key terms together in a single go-to location for easy review.

Dr. Michelle "Shelley" McGuire teaches in the Department of Food Science and Human Nutrition at Washington State University. She is the author of several published articles, and specializes in the research of understanding of how breastfeeding and lactation influence both maternal and child health and well-being. Recent research has focused on investigating how maternal diet influences milk fat content and, thus, energy intake and fatty acid consumption of the breastfeeding child. Dr. McGuire has been teaching the basic nutrition course for several years and has a strong appreciation of the course, its goals and objectives, and the variety of student needs. This experience coupled with her strong writing and research background has helped her create an exciting and refreshing text for the introductory nutrition course.

Dr. Beerman teaches in the School of Biological Sciences at Washington State University. She is the author of several published articles assessing the impact of bioactive components in soy (isoflavones) on health parameters in menopausal women. More recently, she has been studying the prevalence of iron deficiency anemia in rural, impoverished regions of Guatemala, and efficacy of a novel approach to improve iron status in women and children. Dr. Beerman teaches the 300-level nutrition course for health-related majors (Nutrition, Health, and Disease), as well as courses related to women's health (Biology of Women). She also teaches a course in teaching methodology (Teaching Methods in Higher Education) for graduate students. Since joining the faculty at Washington State University in 1989, she has taught more than 12,000 students and has been the recipient of several college and university teaching awards. Dr. Beerman's years of teaching experience, combined with her wide knowledge base in nutrition, health sciences and educational pedagogy, has helped create this innovative introductory nutrition text.

I got exactly what I paid for. The book arrived on time and was brand new. The supplementary online access was really helpful for reviewing topics that might be confusing. It's easy to understand

and has lots of colorful graphics to enhance the learning experience. Perfect condition and shipping was great! This was my first time renting a textbook from here and I thought it'd be more of a hassle, but it was a smooth ride the whole way.

Arrived the day after I purchased it brand new with safe and padded shipping. Recommended

Exactly as listed, a lot of books in my experience are tricky when purchasing because the listing will say one thing but then you receive something not satisfactory. Came wrapped in a plastic covering to keep it clean while shipping which I appreciate. Will benefit me in my Nutrition course this year!

Good book, helped with my nutrition class.

My text came very fast and as expected. Will definitely order from bombbooks again!!
