Getting Started With 3D Carving: Five Step-by-Step Projects To Launch You On Your Maker Journey

Synopsis

This book was written for people who have never used a 3D carving machine. It teaches the basics of designing and making things with Inventables' software (Easel) and 3D carving machines (X-Carve and Carvey). We'll take you step-by-step through five projects you can build yourself as a beginner: an inspiration tile, kitchen cutting board, custom block stamp, fidget spinner, and balsa wood glider. The book also features aspirational projects from makers in the community, like an electric guitar, to show what is possible through 3D carving. The design files and instructions for projects - ranging from beginner to expert - can be found on the Inventables website.

Book Information

Paperback: 152 pages

Publisher: Maker Media, Inc; 1 edition (August 27, 2017)

Language: English

ISBN-10: 1680450999

ISBN-13: 978-1680450996

Product Dimensions: 5.6 x 0.3 x 8.5 inches

Shipping Weight: 7.8 ounces (View shipping rates and policies)

Average Customer Review: 3.5 out of 5 stars 2 customer reviews

[View larger](#) More Than a Book: A Community We believe in the power of community. We believe a community that helps each other out ÁfÂ¢Â ª Á• especially when equipped with easy-to-use tools ÁfÂ¢Â ª Á• can learn together and change the world. This book is about building a community of encouragement and making 3D carving accessible. We have three core values in our community: independence, collaboration, and kindness. In a traditional book youÁfÂ¢Â ª Á•d read all about what those values mean. In this book, weÁfÂ¢Â ª Á•re going to do a project together as a community. My hope is youÁfÂ¢Â ª Á•ll learn what these values mean through experiencing them. For each project, I worked with a maker from the community. They each have a project page on Inventables where you can find all the files and materials youÁfÂ¢Â ª Á•ll need to follow their build plus supplementary videos and a forum

where you can post your remake. We designed challenges so that you can participate with the rest of the community so your work becomes part of a larger global effort. The project we are going to do together has never been done before. It's a project that if we are successful will set a world record! Look inside the book to find details and the URL. This book will be successful if 100,000 people tweet "#GSW3DCbook brought out the maker in me." But you've got to mean it! Until then, #letscarve!

Zach Kaplan is the founder and CEO of Inventables, the leader in 3D carving. A maker his whole life, he is on a mission to ignite digital manufacturing worldwide and provide everyone with ambition a way to get started. Inventables' flagship products Easel, Carvey, and X-Carve are used by a new wave of makers carving everything from circuit boards to skate boards. Named a "modern Leonardo" by the Museum of Science and Industry and a 40 under 40 by Crain's Chicago Business, his dream is to create a world with 2 million digital manufacturers that have raving fans, not just customers. Kaplan has been featured on National Public Radio and has presented at the TED Conference.

Not at all what I expected, project links to YouTube.

great book
