An Introduction To Coal Technology, Second Edition (Energy Science & Engineering Series)

Synopsis

An Introduction to Coal Technology completely describes coal technology research and development. Coal is an important primary fuel throughout the world and research has spread from coal liquefaction and gasification to technologies for developing clean coal. The book is divided into two parts. Part I focuses on the formation and fundamental properties of coal. Part II addresses recent developments and important technical processes such as the preparation and combustion techniques of clean coal, environmental management of coal, and fast pyrolysis. This Second Edition builds upon and updates the successful treatment presented in Dr. Berkowitz's esteemed 1979 book.

Book Information

Series: Energy Science & Engineering Series

Hardcover: 398 pages

Publisher: Academic Press; 2 edition (December 16, 1993)

Language: English

ISBN-10: 0120919516

ISBN-13: 978-0120919512

Product Dimensions: 6 x 0.9 x 9 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)

Customer Reviews

"The numerous illustrations are a strength of this book."--AMERICAN SCIENTIST
"What is coal, and what happens to it if you wash, break, shake, bake, broil, boil, dissolve or burn it? An Introduction to Coal Technology answers these questions. [The book] is well-organized, readable and abundantly illustrated. Anyone needing a general reference, a technical review or an entree to the literature could use this book."--AMERICAN SCIENTIST

Norbert Berkowitz's many awards and accomplishments include the Confederation Medal from the Government of Canada, the Order of Canada, and the Queen Elizabeth Medal. Dr. Berkowitz has

been the Head of the Fuel Sciences Division on the Alberta Research Council, a board member and vice-chairman for the Energy Resources Conservation Board in Alberta, and a professor of fuel science at the University of Alberta. He has served as a visiting professor at several universities including the University of Utah; Technion in Haifa, Israel; and Ben Gurion University in Beer Sheva, Israel, and in Kyoto, Japan. Dr. Berkowitz is the author of An Introduction to Coal Technology and is currently Emeritus Professor of fuel science at the University of Alberta.
